To start I think that the Amazon rainforest needs to be protected because it contains marvelous creatures that are worth saving.

My argument about my statement is that the rain forest has plants that can contain things that could help us cure cancer or other things like viruses and disease and infections. The Amazon rainforest should be seen because they contain marvelous creatures that can benefit the land.

Another reason why I think the Amazon rainforest should be protected because it can benefit us in different ways another thing is it can benefit animals Amazon rainforest We also see the Amazon rainforest should be protected because it contains creatures that can only live in the rainforest like for instance the sloth and it's also my favorite animal so ya.

A way that can save the Amazon rainforest is by stop chopping down trees and stop burning the trees Abusing it for money Because it is very special so we should protect it as best as we can. And a way another way that we can save the rainforest with by stop being so greedy about money thinking about the consequences A way we can stop this is by not allowing governments to take control over this cuz it also produces a lot of water and also holds many indigenous people which means you'll be harming animals and people in behind mean basically the entire world.

To conclude My paper is talking about how people are taking advantage of the Amazon rainforest and Materials for money and that means They burn down trees in Amazon rainforest to get money and they take necessities things that the rainforest needs to survive and it also takes food from the animals that live there That's why I think people are taking advantage of the rainforest but not in a good way that's going to benefit anyone But the person who decided to do harm the rainforest And depleted from all its resources and that is why I think people are taking advantage of the Amazon rainforest in all its beautiful things that it contains and if we keep doing this and we keep harming it and we keep damaging It You are not going to Advanced we're just track back and not be able to advance without it because it is the most Useful thing in this planet because it can give us more air oxygen and that's why I think people are doing harm and doing wrong.
