Let's save The Amazon RainForest

How does the Amazon Rainforest give a big impact of air to the world? If we keep cutting trees down this could damage all parts of the world. Not only this but we will be the cause if we ever take full advantage of the Amazon Rainforest. This is why we will need laws about cutting down trees. What will we do with the animals? We will also find a plan because they are also giving us benefits like keeping the trees safe.

To keep trees safe you would have to fight against pollution, not only this but we should try methods some of us don't really use. We could start off by using reusable items, and find a different way to go to places rather than a car. Like using a bike, scooter, subways, walking, boats. This can help to make smoke that would go up to the air and make air pollution that would cause global warming.

Why should we care if the animals in the Amazon Rainforest go extinct? I believe that we should care because, even if you believe that the animals in the rainforest don't have benefits in the world, they actually do, like otters would help eat the fish so there isn't such a big population of fish. Another example would be an Ocelot, they eat Rabbits, rodents, and frogs. All of the animals that get eaten as well but it's just a cycle that goes around.

I believe that the world should stop the destruction in the rainforest for the reason that it would populate things too much and extinct more animals. This would go for the trees as well. If we keep damaging the world

we can damage our health, animals health, and the planet's health. We can stop this if we just listen to these simple rules above.
